William Chin

Brooklyn, NY | (347) 703-0498 | william-chin@outlook.com | LinkedIn | GitHub

Technical Skills	Ruby on Rails, Node.js, Express, Javascript, jQuery, MongoDB, HTML5, CSS3

Experience

Web Developer, Web Development Immersive, General Assembly
Sept. 2015-Dec. 2015
- Independently created and deployed Smashed app using Ruby on Rails, this is a reddit-like app where people can post, comment and like content
- Co-created Movies with Friends app with a team of developers, an app that uses The Movie Database API to help users find movies that they want to see with their friends. My job was primarily to build the back-end authentication using tokens.
- Built BarFinder app using Javascript and Google Maps API, this app finds local bars in the area that are open based on your geolocation
